RIPHAH International Colleges										
A Project of RIPHAH International University										
Course Outline										
Course	Course		Web Applica	tion Development						
Information Course ID					Course Type	Comput		ctive		
	Credit hours		2		Hours per week	1(Th)-3(	Lab)			
	Progra	ogram(s) ADP Computi		ing (CS) (C-L) Semester Session		Fall 2024	4			
Course				on to many of the ba				elated to		
Description	design	ning (Graph	ic Design and	Software Design), de	veloping and deploy	ing web s	ites. D	uring the		
			Il learn about architectural and design issues that are unique to web development.							
	They get hands on practical knowledge of Web Design (Graphics), HTML, XHTML, JavaScript,						t, DHTML			
-	<u> </u>		eb 2.0 concept							
Program	No	_	am Learning	Description						
Learning Outcome(PL	PLO1	Outco L Know		Apply knowledge o	f computing fundan	ontals kr	owloc	lgo of a		
0)			g Computing	Apply knowledge of computing fundame computing specialization, and mathematic				_		
<b>-</b>		Proble			ate for the computin					
					conceptualization of					
				defined problems ar			-			
	PLO2	2 Ability	to Design	Apply design and d	evelopment principle	es in the c	onstru	iction of		
				software systems of	varying complexity.					
	PLO3	3 Proble	em Analysis	Identify and solve complex computing problems reaching						
				substantiated				11		
				conclusions using fundamental principles						
			computing							
	PLO <sup>4</sup>	1 Mode	sciences, and relevant domain disciplines  Tool Usage Create, select, or adapt and then apply appropriate techniques,					hniques		
	PLO4 MIOU		resources, and modern computing tools to comple							
			activities, with an understanding of the limitations					, a can 18		
	PLO5	Individ	dual and	Function effectively as an individual and as a member or leader			eader of			
		Team	work	a team in multidisciplinary settings						
Course										
Objectives				ts design and develop	fully functional web	site. When	stude	nts		
(CO)	complete this course, they will be able to;									
	No.	Objective						Relation		
	110.			Objective				with PLO		
	CO1.	Understa	nding the basic	e basic components in a web development				PLO1		
	CO2.		the basic syntax of the web related languages				PLO2			
	CO3.	_	he features of web development: front end development and backend			end	PLO2			
		developm								
	CO4.	Developin	ng web applicat	tion to solve the real-	world problems			PLO5		
Course										
Learning Outcomes	At the	At the end of this course students will be able to;								
(CLO)	No.		Outcome		Relatio	ВТ	PLO

Prerequisite s								
Textbook	Title		Editio n	Authors	Publisher	Year	ISBN	
	Programming Pro	fessional F	PHP5		Dave W. Mercer,Alla n Kent,Steven D. Nowicki,Dav id Mercer,Wan kyu Choi	Wiley	2005	978-0-764- 55783-5
Reference Books	Beginning PHP5, Apache, and Mysql Web Development			11 <sup>th</sup> Editio n	Elizabeth Naramore,M ichael "BuzzLY" Glass	Wrox	2005	978-0-764- 57966-0
Course Software or Tool	Netbeans, Windows OS, Notpad++, Notpad, Sublime Text, Wamp Server							
Assessment Criteria	Assessment	Weight	Used to		Assessment		Weight	Used to attain CLO
(100%)	Assignment	5%	CLO:	1,2,4	Quiz		5%	CLO1,3,4
	Lab	15%	CLO1	,3,4,5	Project / Prese	entation	10%	CLO 3,4,5
	Mid Term	25%	CLO1	,2,3,4	Final		40%	CLO1,2,3,4
Methods of Evaluation	Quizzes, Assignments, Mid/Final exam, Lab, Project							
Notes								

Week No.	Topic	Lecture No.	Lecture Contents	Class Activity	Tasks
W1.	Introduction	L1.	<ul> <li>Introduction / Importance of the World Wide Web, Static &amp; Dynamic Websites, Markup Languages Vs Programming Languages</li> <li>Hypertext Markup Language (HTML), Tags, Attributes, Enhancements, HTML Standards, Creating HTML Document, HTML File Structure, HTML Editors, Web pages file extensions.</li> <li>Basic Structure of HTML Document, Paragraphs, Formatting Text, Linking,</li> </ul>	Activity: Introduction of each student	Homework: Find out the latest Java compilers
			Images, Tables, Forms, Meta tags.	A .: ::	
W2.	Basic CSS	L3.	<ul><li>Introducing CSS,</li><li>External CSS Style, Sheets</li></ul>	Activity: Create an HTML page and add image.	
		L4.	<ul> <li>CSS Properties, Controlling Fonts, Text Formatting.</li> </ul>		

W3.		L5.	<ul><li>CSS in Selectors, Lengths,</li><li>Dimensions, Links,</li><li>Backgrounds,</li></ul>	Assignment 1
	Advanced CSS	L6.	<ul> <li>Lists, Tables, Outlines,</li> <li>Generated Content,</li> <li>Overflow, Page Layout.</li> </ul>	
W4.	Introduction to Scripting Language	L7.	<ul> <li>Introduction to JavaScript,</li> <li>Document Object Model,</li> <li>JavaScript for Onclick functions.</li> </ul>	Quiz 1
		L8.	Objects, Methods, and     Properties.	
W5.	Data handling	L9.	<ul><li>The Forms Collection, Quiz 2</li><li>Images Collection</li></ul>	Assignment 2
	with JavaScript	L10.	<ul> <li>Functions, Events, Built-in</li> <li>Objects, String, Date, Math,</li> <li>Array, Window</li> </ul>	
W6.		L11.	<ul> <li>Make slider using HTML, CSS, JavaScript &amp; jQuery.</li> </ul>	
	Project Proposal	L12.	<ul> <li>Make Drop Down menu</li> <li>using HTML, CSS, JavaScript</li> <li>jQuery.</li> </ul>	
W7.	Building	L13.	<ul> <li>Introduction to Bootstrap,</li> <li>Containers, Implementation</li> <li>of Grid,</li> <li>Task: Learn how</li> <li>to use Bootstrap</li> <li>in web project.</li> </ul>	Quiz 2
	Responsive Website	L14.	<ul> <li>Form control, Floating labels,</li> <li>Modal, Buttons, Collapse,</li> <li>Carousel</li> </ul>	
W8.	Building Responsive	L15.	- Form control	
	Website	L16.	- Revision	
W9.	Mid Term Exam	L17. L18.	Mid Term Examination	
W10.	Backend Development (Introduction to PhP)	L19.	<ul> <li>Getting Started with the PHP, Static Vs Dynamic Pages, Dynamic Pages and PHP,</li> <li>Installation, Platforms &amp; Web Servers</li> <li>MySQL, Installation, Writing</li> </ul> Task: Learn how create connection with database.	
	,	120.	First Example of PHP, Common Errors with PHP	
W11.	Backend Development (Development in PhP)	L21.	<ul> <li>Working with variables,</li> <li>Conditional Statements,</li> <li>Loops.</li> <li>Nested Functions and</li> <li>Recursion</li> <li>Simple Arrays, Initializing</li> <li>Arrays</li> <li>Multidimensional Arrays</li> </ul>	Quiz 3
W12.	Project Proposal	L23.	Create employee     management module using     HTML ,CSS, JavaScript, PhP      Create employee module in	

			detail	
W13.	PhP Framworks (Introduction)	L25.	<ul> <li>Introduction to WordPress,</li> <li>Getting Started with</li> <li>WordPress, Creating Blog</li> <li>Content</li> <li>Pages, Media, And</li> </ul>	
			Importing/Exporting Content	
W14.	PhP Framworks	L27.	<ul><li>Introduction to WordPress (wp-admin) panel</li><li>Activity: How create Blogs?</li></ul>	Quiz 4
	(Ecommerce)	L28.	<ul> <li>Installing a plugin</li> </ul>	
W15.	PhP Framworks	L29.	<ul> <li>Introduction, Connectivity</li> <li>with Database, Load or add a</li> <li>model in Codelgniter</li> </ul>	Assignment 4
	(Codelgniter)	L30.	<ul> <li>Add / link an images/CSS/JavaScript from a view in Codelgniter, Extend the class in Codelgniter</li> </ul>	
W16.	PhP Framworks	L31.	<ul> <li>Add record in Codelgniter,</li> <li>Get last inserted id in Codelgniter, View, Update and Delete a record in Codelgniter,</li> </ul>	
	(Blog Development)	L32.	<ul> <li>Codelgniter: Introduction,</li> <li>Sessions in Codelgniter.</li> <li>Read, write, or remove</li> <li>session in Codelgniter, Intro</li> <li>to Helpers, Libraries, and</li> <li>difference between them.</li> <li>Routing between classes,</li> <li>Session Library, Encrypt Class</li> </ul>	
W17.	Project	L33.	<ul><li>Project Demonstrations</li><li>Project</li><li>Demonstrations</li></ul>	
	Demonstration	L34.	<ul> <li>Make an Employee</li> <li>Management Module in</li> <li>Codelgniter Web Framework</li> </ul>	
W18.	Final Term Exam		<ul> <li>Final examination</li> </ul>	

## **LAB CONTENT**

Week No.	Topic	Lab Contents / Activity	Home Tasks
W1.	Introduction	<ul> <li>Create a CV Using HTML</li> </ul>	
W2.	Basic CSS	<ul> <li>Create a Sigunup Form Using HTML and css</li> </ul>	
W3.	Advanced CSS	<ul><li>Create a Slider</li></ul>	
W4.	Introduction to Scripting Language	<ul> <li>Create a Basic Structure (Menu, Slider, 3 Boxes)</li> </ul>	
W5.	Data handling with JavaScript	<ul> <li>Create a Form and apply validation using JavaScript</li> </ul>	
W6.	Data handling with JavaScript	<ul> <li>Write a JavaScript program to find the area of a triangle where lengths of the three of its sides are 5, 6, 7.</li> <li>Write a JavaScript program to get the current date</li> <li>Write a JavaScript program to calculate</li> </ul>	

	T		
		multiplication and division of two numbers	
		Write a JavaScript program to convert	
		temperatures to and from Celsius,	
W7.	Building Responsive	Fahrenheit  - Write a JavaScript program to get the	
VV 7.	Website	website URL (loading page).	
	Website	<ul> <li>Write a JavaScript function to get the value</li> </ul>	
		of the href, hreflang, rel, target, and type	
		attributes of the specified link	
W8.	Building Responsive	Write a JavaScript function to add rows to a	
	Website	table	
		<ul> <li>Write a JavaScript program to remove</li> </ul>	
		items from a dropdown list	
W9.		– Mid-Term	
W10.		<ul> <li>PHP – Environment Setup</li> </ul>	_
		<ul> <li>Common Uses of PHP</li> </ul>	
	Backend	<ul> <li>Characteristics of PHP</li> </ul>	
	Development	<ul> <li>"Hello World" Script in PHP</li> </ul>	
	(Introduction to PhP)	<ul> <li>PHP – Variable Types</li> </ul>	
		- PHP - Constants.	
		PHP – Operator Types  PLIP – Decision Median	
		PHP – Decision Making  PUR – Lean Tyrns	
		<ul><li>PHP – Loop Types</li><li>PHP – Arrays</li></ul>	
W11.		Create database using PHP code.	
VV 11.	Backend	<ul> <li>Create database using FTF code.</li> <li>Create a MySQL Table Using MySQLi using</li> </ul>	_
	Development (PhP)	php	
	, ,	<ul> <li>Insert Multiple Records into MySQLi using</li> </ul>	
		php	
W12.	Backend	<ul> <li>Select Data from a MySQLi Database using</li> </ul>	_
	Development (PhP)	php	
		<ul> <li>Delete Data from a MySQLi Table using php</li> </ul>	
W13.	Backend	<ul> <li>Update Data in a MySQLi Table using php</li> </ul>	_
	Development (PhP)	<ul> <li>Authentication system applying with</li> </ul>	
		session using php	
W14.	PhP Framworks	<ul> <li>install or setup Codelgniter In Xampp</li> </ul>	_
	(Introduction)	Server	
		<ul> <li>Hello world example - Codelgniter</li> </ul>	
		framework	
		Connect to a database in codeigniter	
		Database configuration Codeigniter  framework	
W15.	PhP Framworks	framework  - Insert data in to data base using	
VV 13.	(Codelgniter)	<ul> <li>Insert data in to data base using</li> <li>Codeigniter framework</li> </ul>	_
	(Soucibilite)	<ul> <li>Fetch and view data from database using</li> </ul>	
		Codeigniter framework	
W16.	PhP Framworks (Blog	<ul> <li>Update data in to database using</li> </ul>	_
	Development)	Codeigniter framework	
		<ul> <li>Delete data in to database using</li> </ul>	
		Codeigniter framework	
W17.	PhP Framworks	<ul> <li>WordPress implementation</li> </ul>	-
	(Ecommerce)		
W18.		<ul><li>Final-Term</li></ul>
